

Crema Vialle Marble

Crema Vialle marble has been carefully selected in a tumbled finish to replicate the look of a travertine. There are two key advantages of using this marble over a travertine; 1) marble is dense and therefore more durable when used outdoors 2) marble doesn't require filling. This marble is perfect of external applications when durability and colour consistency are key. For a seamless finish from inside to outside use internally and Crema Vialle Tumbled externally.

Use	Applications	Finishes
- interior	- walls	- tumbled(T)
- exterior	- floors
