

Embrace Bath

Sareen Stone commissioned Landscape Architect Julian Brady of Sitedesign (), who has completed inspiring projects around the world, to design a bespoke bathtub to launch at DesignEx 2010.

Inspired by the balance of Yin Yang, Julian designed a twin set of luxurious baths that 'EMBRACE' each other. With two baths couples can enjoy a shared bathing experience or one bath can be used as a stand-alone feature. Each bath is hand-carved from a single large block of stone, and has been designed ergonomically for comfort and the ultimate harmonious bathing experience. The baths have been named 'EMBRACE'.

'EMBRACE' is suitable for interior bathrooms, day spas and resorts and can also be used externally for bathing in and amongst nature. Available in a choice of two colours either Andecite, a charcoal grey volcanic stone or Classic Travertine. One of each colour, light and dark, used together completes the Yin and Yang.

Use	Applications	Finishes
- interior	- floor	- polished
- exterior		- bush hammered

Available Sizes
- 2150mm x 1130mm

Specifications
- Weight: 1.8 tonne
